

## **XFORMA PRESENTS THE MBX MKII LIMITED EDITION PC CASE**

Vancouver, Canada—April 13, 2015— XFORMA, creator of premium PC cases and accessories, today announced that the MBX MKII Limited Edition case is in production and available to pre-order. A limited series of 250 MKII cases are offered for sale, and are being manufactured in cooperation with SilverStone Technology; a Taiwan based global leader in the PC industry.

With the MKII, XFORMA takes aim at the high-end segment of the market. "Conversations with our Customers over the years led us to conclude that there's legitimate interest in a precision-crafted, ultra-refined product like the MKII. Every other area of consumer electronics has a premium segment except desktop PC cases, and we're proud to introduce the MKII into this underserved segment of the market." —Charles Harwood, Founder of XFORMA.

With its integrated systems, the MKII offers a "ready-to-go" case to discerning Enthusiasts wanting to create their own high-performance dream PC. Until now, such machines were exclusively available through boutique PC system builders. The MKII is unique in that it eliminates the need for extensive DIY tools or skills to achieve a beautiful, tailor-made result. "Our goal with the MKII was to design the definitive enclosure for creating the ultimate liquid-cooled PC; a machine that effectively blends extreme-performance with bold, refined styling."

### **Pricing and Availability**

The price of the MBX MKII is US\$1,250 in its base configuration. Original add-on parts designed specifically for the MKII are available to further enhance the case's form and functionality. XFORMA is taking orders now and expects production to be completed this summer. More details and ordering information are available at: [www.xforma.com](http://www.xforma.com)
